THE AMERICAN HISTORICAL ASSOCIATION (AHA)  
COMMITTEE FOR THE STUDY OF WAR DOCUMENTS

GUIDES TO GERMAN RECORDS MICROFILMED AT ALEXANDRIA, VA.

This is part of a series of Guides prepared by the American Historical Association listing records microfilmed at Alexandria, Va., by the American Historical Association Microfilming Project.

An American Committee for the Study of War Documents was established in 1955 as a private group of scholars, interested in documentary research and especially in the microfilming of records of foreign origin kept in American depositories. In 1956, the American Committee became a committee of the American Historical Association. Its present chairman (1960) is Professor Oron J. Hale, University of Virginia, who was preceded by Dean Reginald H. Phelps, Harvard University, and Professor Lynn M. Case of the University of Pennsylvania. An initial Ford Foundation grant and additional funds provided by the Old Dominion Foundation, Lilly Endowment, and Avalon Foundation enabled the Committee to undertake the cataloguing and microfilming of declassified German records in the custody of the World War II Records Division of the National Archives (previously TAGO, Departmental Records Branch) at Alexandria, Virginia.

The plans for screening and microfilming of these materials were prepared by a Subcommittee on Microfilming under the chairmanship to the end of 1956 of Professor E. Malcolm Carroll, Duke University, and his successor, Dr. Fritz T. Epstein, The Library of Congress. The microfilming team at Alexandria was under the direction of Professor Gerhard L. Weinberg of the University of Michigan in 1956/57, of Dr. Dagmar Horna Perman from 1957 to September 1959, of Mr. James G. McDowell from September 1959 to August 1960, and is now under the supervision of Dr. Willard Allen Fletcher of the University of Colorado.

The American Historical Association expresses its appreciation for the cooperation given to its Committee for the Study of War Documents by the staffs of the National Archives, especially its World War II Records Division, as well as the U.S. Department of the Army.

## P R E F A C E

This Guide is one of a series of finding aids describing those declassified seized German records deposited at the World War II Records Division, National Archives, which have been microfilmed by the Microfilming Project of the Committee for the Study of War Documents of the American Historical Association. The Guide contains the text of data sheets identifying records filmed. A copy of the data sheets has been filmed as a target sheet at the beginning of each roll of film.

The present Guide covers 78 rolls of film of records of the Oberkommando der Luftwaffe. The greatest part of the correspondence contained in this collection is that of the Reichsluftfahrtministerium, Generalluftzeugmeister (GL), and its branch offices, the Technische Amt, LC III, LC 6 and 7. The files deal chiefly with the procurement of armaments and supplies for the Luftwaffe and thus contain correspondence with German firms engaged in war production, with foreign firms for raw materials supply, and with Erprobungsstellen of the air force. The documentation also includes information on foreign - especially Russian - armaments, used by the Erprobungsstellen and private firms engaged in research on, and production of, air force equipment.

The files for the period 1927-1939 contain chiefly correspondence pertaining to the reorganization of the Reichsluftfahrtministerium in 1939, plans for peace-time manoeuvres, mobilization and civilian air defense. A major source of information on the war operations of the Luftwaffe is the collection of the Kriegstagebücher, especially those of Luftflotten 3 and 6. Much additional information is yielded by the daily reports of the smaller units, the largest group of which originated with Flak units, and which constitute an important supplement to the estimates of the situation.

Information on the organization of the Luftwaffe is to be found in the various booklets issued by the Reichsminister der Luftfahrt und Oberbefehlshaber der Luftwaffe (R.d.L.u.Ob.d.L.). They also contain instructions on the recruitment and treatment of non-commissioned officers, regular and war-time officers, Luftwaffen- und Flakhelferinnen, and Luftwaffenhelfer. Organizational charts of the Air Ministry and the OKL, as well as Stärkenachweisungen for various units, are also included.

A large segment of the record group is made of printed material. The Deutsche Akademie der Luftfahrtforschung and the Technische Amt published a considerable amount of technical data, samples of which have been filmed. However, propaganda material, such as "Mitteilungen für die Truppen," "Unterrichtsunterlagen für die geistige Betreuung der Truppen," and instruction material issued by the various offices of the Wehrmacht Propaganda has been filmed in its entirety.

Originally the folders in this collection had been numbered in the order of acquisition. This system was abandoned when, prior to filming, the entire collection was reorganized. The attention of the reader is also directed to pertinent material described in other guides, especially Guides 7, 10, 12, 17, 18, 19 and 25.

The terms "Serial" and "Roll" in this Guide refer to the sequence of film. The "Item" number is the identification symbol on the original folder within the captured records collection. "Provenance" indicates, where ascertainable, the archival origin of the documents whose description follows. The symbol "FT" means that the folder has been filmed throughout; the symbol "FS" denotes that the folder has

Continued

been filmed selectively. "1st Frame" gives the frame number of the first page of the folder. Every exposure has been given a frame number consecutively throughout the filming operation. The "Notes" provide a general idea of the nature of the materials but should not be taken as exhaustive descriptions. Apart from a few minor rearrangements folders were filmed in numerical order. Although, on the whole, subjects tended to appear coherently and in numerical sequence, it is still necessary to check the whole Guide for any one subject.

The original records have been returned to the Federal Republic of Germany. The microfilms are deposited in the National Archives, Washington 25, D.C., as microcopy T-321, rolls 1-78, and should be requested by adding "T-321" to the rolls desired.

## Price List for Records of Headquarters of the German Air Force High Command

National Archives Microcopy No. T-321

Microfilm copies of one or more rolls of the microfilm may be purchased at the prices listed below. The prices are based on a charge of 8 cents for each foot of microfilm, with all prices rounded off to the nearest dollar. A 10-percent discount is given on orders for more than \$1,000 and a 15-percent discount on orders for more than \$3,000.

Rolls containing privileged material are designated by the symbol R before the roll number. They are not available for sale and are therefore not included in this list.

Checks or money orders for microfilm should accompany the order. They should be made payable to the General Services Administration (NNSA) and should be sent to the National Archives, Washington 25, D. C. Persons ordering microfilm from outside the United States or its possessions should make their remittance by international money order or check drawn in United States dollars on a bank in the United States and payable to the General Services Administration (NNSA). Each order should specify the microcopy number (T-321), the roll number or numbers, and the price.
